塑膠回收設施

Plastic Recycling Facility

了解塑膠回收設施
Plastic Recycling Facility
introduction

屯門環保園的塑膠回收設施（於2022年落成）為香港首個可達準食品級的塑膠回收設施，佔地65,000平方呎，每年可處理及回收35,000公噸本地廢棄的PET塑料（聚對苯二甲酸乙二醇酯或飲品膠樽）及HDPE塑料（高密度聚乙烯或個人護理產品塑膠容器）。設施能將已分類的PET及HDPE塑料轉化為可達準食品級的rPET及高端rHDPE薄片，供高品質消費或工業製品作原材料使用，延長可重用塑膠的生命。塑膠回收設施同時配備污水處理設備、太陽能光伏電池板及再生熱能的加熱系統等環保特色。

設施由碧瑤向環境保護署承租 20 年環保園用地，並由碧瑤、歐綠保集團（亞洲）有限公司及太古可口可樂有限公司合組的聯營公司－塑新生有限公司負責營運。

The plastic recycling facility in EcoPark commenced operations in 2022 and it is Hong Kong's first food-grade ready plastics recycling facility. Spanning an area of 65,000 sq. ft., this facility has an impressive capacity to process and recycle 35,000 metric tonnes of the post-consumer PET (polyethylene terephthalate or clear beverage bottles) and HDPE (high-density polyethylene or personal care bottles) plastic materials annually. The facility effectively converts classified PET and HDPE plastics waste into food-grade ready rPET and high-grade rHDPE flakes, the valuable raw materials for the production of high-quality consumable and industrial products. This recovery process significantly extends the lifespan of reusable plastics, thereby minimizing the amount of plastics destined for landfill sites or marine environments. The facility incorporates eco-friendly features such as wastewater treatment, full photovoltaic solar panels, and heat recovery systems.

Baguio has obtained a 20 year lease for the facility from the Environmental Protection Department of Hong Kong. The facility's operations are carried out through a collaborative effort between Baguio and the joint venture company, New Life Plastics Limited. This joint venture is comprised of Baguio, ALBA Group Asia Limited, and Swire Coca-Cola Limited.

Ngau Tam Mei Animal Waste Composting Plant (AWCP)

碧瑤與怡和機械有限公司聯營的牛潭尾動物廢料堆肥廠為機電工程署轄下的廢物處理設施，於2008年落成，每日處理量最高達40噸廢料。堆肥廠每日收集來自馬會的馬廐廢物，並加入收集自本地的園林廢物(如碎草及樹葉)，利用密封式有氧堆肥方法，經過約40-50日的腐熟時間，將其轉化成有機土壤改良劑(綠機土)，並獲有機資源中心的認證，供農業及園藝使用。

The Ngau Tam Mei Animal Waste Composting Plant (AWCP), jointly operated by Baguio and Jardine Engineering Corporation Limited, is a waste treatment facility under the purview of the Electrical & Mechanical Services Department. Completed in 2008, the plant has a daily maximum capacity of 40 tons of waste. The facility collects horse manure waste from the Hong Kong Jockey Club (HKJC) and combines it with local yard waste such as grass clippings and leaves. Through sealed aerobic composting method and maturation process, the waste transform into an organic soil conditioner (BGSoil), which is certified by the Hong Kong Organic Resources Centre Certification Limited for agricultural and horticultural uses.

位於屯門環保園的生物炭製造廠，由碧瑤與怡和機械有限公司聯營，於2023年啟用，佔地37,000平方尺。此先進設施每日處理達15噸木質廢料，包括園林廢料、木卡板及木屑等，通過熱裂解過程在無氧狀態下，將廢料以高溫分解轉化為生物炭和木醋液。

生物炭主要以碳分子組成，擁有多孔特性、低密度及高比表面積，適合應用在土壤改良，有效保存水份和營養，調節土壤酸鹼度，並可用於農業、園藝及建築物料。

Located in the Eco Park, Tuen Mun, the Biochar Production Plant is operated jointly by Baggio and Jardine Engineering Corporation Limited. It commenced operations in 2023 and covers an area of 37,000 sq. ft. This advanced facility processes up to 15 tons of wooden waste daily, including garden waste, pallet and wood chips. By utilizing pyrolysis process, waste is decomposed at high temperatures in an oxygen-free or oxygen-limited environment, transforming into biochar and wood vinegar.

Biochar composed primarily of carbon molecules, is characterized by its porous nature, low density, and large surface area. These properties make it highly suitable for soil improvement, as it enhances water and nutrient retention and soil pH regulation. It finds application in agriculture, horticulture, and as construction material.
